

I have registered every phone no. I and my 3 children have on the do not call list. I am fully in support of the stricter rules implemented by NJ. I have received several calls from companies since signing up and have immediately reported them on the federal do not call site. I feel strongly that no one should have the right to call me to try to sell me something. I pay for my phone services so I should have the right to determine if I want to receive un-solicited calls.
